

Hub 2

Control panel with alarm photo verification support monitors operation of all Ajax detectors and immediately sends an alarm signal to the owner and the Central Monitoring Station.

2x 2G SIM, Ethernet

Tech specs

Classification	The radio channel central unit with the support of visual alarm verification detectors
Security groups	9
Connected devices	100
Users	50
Scenarios	32
Jeweller radio technology	Communication range with detectors — up to 2,000 m in an open space Two-way communication between devices Operating frequencies — 868,0 - 868,6 MHz Self-adjusting RF output power — up to 25 mW Block encryption based on AES algorithm Detector polling period — 12–300 s Frequency hopping

Transmits photos from MotionCam detectors

Automatically notifies the alarm response company

Communicates via 3 independent channels
