

Hub Plus

Advanced control panel with alarm photo verification support monitors operation of all Ajax detectors and immediately sends an alarm signal to the owner and the Central Monitoring Station.

2x 2G/3, SIM, Ethernet, Wi-Fi

Classification	Intelligent central unit of the security system with Wi-Fi and Ethernet modules, and dual SIM
Security groups	25
Connected devices	150
Users	99
Scenarios	64

Jeweller radio technology

Communication range with detectors — up to 2000 m in an open area
Two-way communication between devices
Operating frequencies — 868.0 - 868.6 MHz
Self-adjusting RF output power — up to 25 mW
Block encryption based on AES algorithm
Detector polling period — 12–300 seconds
Frequency hopping

Uses Wi-Fi, Ethernet, WCDMA and GSM to send alarms to the Central Monitoring Station and the system's owner

Sends a notification in case of electrical power loss and operates for up to 16 hours from battery backup

Checks the functionality of detectors at least every 12 seconds
