

GlassProtect

Detects broken glass using an electret microphone, which registers the sound of impact against the glass and of the glass falling.

Tech specs

Classification	Surface sound radio channel security detector
Sensing element	Electret microphone
Detection angle	180°
Break detection distance	Up to 9 m
Temperature sensor	Available
Sensitivity	Adjustable, 3 levels
Battery life	Up to 7 years
External contact	Yes
Communication range with central unit	Up to 1,000 m in an open space

Ignores thunder, dogs barking and noise outside the window

Operates up to 7 years without battery replacement

Detects breakage at a distance of up to 9 m
