

FireProtect Plus

The device detects smoke by means of a camera with a photoelectric sensor. An additional chemical element detects carbon oxide and raises the alarm.

Tech specs

Classification	Radio channel smoke detector with temperature sensor and built-in siren
Sensing element	Photoelectric, CO and temperature sensors
Volume of built-in siren	85 dB
Type of notification	Sound/light
Alarm signal delivery time	0.15 s
Additional temperature sensor	Available
Battery life	Up to 4 years
Communication range with central unit	Up to 1,300 m in an open space

Registers smoke, sharp jumps in temperature, and dangerous CO levels

Notifies of danger by means of a built-in siren

Can operate independently from hub

The device independently tests the smoke chamber and gives prompt notification of the need to dust
