

Transmitter

The device receives the activation signal from the detector via wired input and sends an alarm to the hub.

Tech specs

Classification	Module for third-party detector integration
Alarm input	1
Tamper input	1
Power supply current	Terminals +/-
Power supply output	3.3 V
Battery charge indication	Yes
Alarm signal delivery time	0.15 s
Power supply	Battery: Three CR123A batteries, Power supply voltage: 3V
Battery life	Up to 5 years
Alarm signal delivery time	0.15 s
Communication range with central unit	Up to 1,600 m in an open space

Converts third-party detectors to the Ajax full-featured devices

It can be used as a power supply for third-party devices

Operates at a temperature of +50°C to -25°C and humidity up to 75%
